(Authorised Certifying Officer)

UNIVERSITY OF QUEENSLAND  
St Lucia Q 4067 Australia  
**INFORMATION CONCERNING OFFICIAL ACADEMIC RECORD**

For students who began their courses in First Semester 1974 or later, computer generated academic records have replaced those issued earlier. Where a student first enrolled prior to 1974, the first entry on this record is normally "credit gained before 1974"; an entry of this nature will indicate that the full academic record is shown in two separate statements. A page entry of the type 1/2 will show that there is more than one statement issued.

#### **STRUCTURE OF ENTRIES**

The entries are grouped to show subjects studied in each semester. The first line of each group indicates the semester in question, the course, attendance status and year of study. Where a student has enrolled in a subject not examined in that semester (e.g. in subjects offered over a year) there will be no entry for the subject in that semester.

Symbols used in attendance status: 'F/T' = full-time; 'P/T' = part-time, 'EXT' = for a student who undertakes a course through the Division of External Studies and 'A/S' = Academic staff undertaking higher degree studies.

The year of the course in which a student is enrolled is shown after 'YR', for example, 'YR 3' is the third year of the course and 'YR H' represents an honours year.

Following the entries relating to subjects and results and the semester totals there may be record notings relating to prizes, to the award of a degree or to other matters.

At the end of the academic record the cumulative total credit point value for the latest course of study is shown following the symbol 'TC' under the column headed 'Credit gained'.

#### **EXPLANATION OF COLUMN HEADINGS**

##### **Semester**

Since 1974 the University has operated under a semester system with first semester running from February to June and second semester from July to November. In the 'semester' column, 84/1 represents First Semester 1984 and 84/2 Second Semester of that year.

##### **Subject Code**

The first two characters of the five character subject code indicate the Department offering the subject. The next character indicates the year or level of the subject. For the last three characters, the subject numbering system is as follows:

100 - 199	Introductory undergraduate subjects	700 - 799	Postgraduate professional subjects
200 - 399	Advanced undergraduate subjects	800 - 899	Masters degree subjects
400 - 699	Later year undergraduate and honours subjects	8Z1 - 9Z9	Postgraduate research and thesis

##### **Subject name**

The subject names on this record are abbreviated versions of the official subject names.

##### **Credit value**

The entries in this column show the credit point values associated with each subject. A credit point represents an average of one hour of work per week by a typical student throughout a semester. For example, it is expected that a 10 credit point subject means an average of 10 hours of class contact time and private study for each week of a semester.

##### **Grade**

The entries used for grades of result obtained for each subject are as follows:

7	P	Non-graded pass
6		
5		
4		
3	2	Failing grades
	1	

A student with a grade of 3 may have to obtain further qualifications before proceeding to higher level study in the same field. In most courses, there is a limit on the number of credit points obtained at a grade of 3 that may be credited towards the course.

Other symbols used, where a grade of result has not been awarded, may include:

EX	Exempt from subject	W	Early cancellation
S	Supplementary examination granted	K	Late cancellation
SP	Special examination granted	X	No assessable work received
Q	Qualifying examination (P = passed N = failed)	--	Incomplete result
AT	Attended lectures	RW	Result withheld

##### **Credit gained**

The figures in this column show the credit point value of subjects in which the student obtained a passing grade.

#### **SEMESTER TOTALS**

At the end of each semester entry, the line showing 'Sem. Totals' includes 3 figures:

- the figure following 'G.P.A.' represents the Grade Point Average obtained by the student in the semester.
- the figure in the column 'Credit Value' shows the total number of credit points in which the student enrolled in that semester.
- the figure in the column 'Credit Gained' is the total credit point value of all subjects in the semester with a passing grade.

#### **AMENDMENTS**

Any amendments to the computer printed record are certified as correct by the authorised Certifying Officer, before signature and lamination of the record.

**The academic record is valid only if signed, stamped and laminated.**
